

DEIVER BRITO

SENIOR PRODUCT DESIGNER | COMPLEX PRODUCTS | DESIGN SYSTEMS | AI & DESIGN-TO-CODE

Florianópolis, SC, Brazil | deiverbrito@gmail.com | linkedin.com/in/deiverbrito | deiver.com.br

PROFESSIONAL SUMMARY

Senior Product Designer with 7+ years in Product Design and an earlier background in digital design. Experienced across complex B2B and B2C products, e-commerce, subscriptions, AI-powered products, Legal Tech, and accessibility. Works end to end from discovery and problem definition through information architecture, UX/UI, prototyping, design systems, validation, documentation, and implementation support. Has 4+ years working with U.S. clients and users in international teams. Currently combines Figma with AI, code-based prototypes, and QA practices to bring design, product, and engineering closer together.

CORE COMPETENCIES

Product Design: Discovery, UX/UI, interaction design, information architecture, user flows, prototyping, complex systems, e-commerce/checkout, subscriptions, accessibility, and enterprise products.

Design Systems & Design Engineering: Figma, variables, semantic tokens, component libraries, light/dark mode, documentation, handoff, React, Storybook, HTML/CSS/JavaScript, GitHub, and Vercel.

Research, data & collaboration: Customer interviews, usability testing, Dovetail, Airtable, Google Analytics, Hotjar, hypothesis framing, hands-on exposure to A/B testing, and collaboration with Product, Engineering, QA, and stakeholders.

Applied AI: Claude/LLMs, Claude Code, Figma AI, and Vercel v0 for exploration, prototyping, state simulation, documentation, and implementation support.

PROFESSIONAL EXPERIENCE

ArcTouch | Senior Product Designer | Apr 2022 - Jul 2026 | Remote, Brazil

- Worked on digital products for global clients, partnering with Product Managers, Engineering, QA, Design, and stakeholders from discovery and definition through delivery and implementation support.
- **CURE Intelligence / SCRIOO:** redesigned an AI-powered B2B SaaS supply-chain risk platform, simplifying risk maps, supplier data, filters, incident history, and comparisons through information architecture, progressive disclosure, and usability testing.
- Created and evolved design-system foundations with component libraries, semantic tokens, light/dark modes, states, documentation, and WCAG AA accessibility.
- **HP:** designed onboarding and subscription experiences covering setup, device selection, plans, add-ons, eligibility, delivery, replacement, returns, cancellation, and backend-driven states.
- **McCormick:** served as Design Lead for an e-commerce initiative within the Flavor Maker app, working with other designers on flows, information architecture, third-party service constraints, digital metrics, and handoff.
- **Theodoor:** led product design for an accessible smart-door automation app, including physical-digital states, multimodal feedback, safety scenarios, edge cases, motion, and behavioral prototypes.
- Used LLMs and AI tools to accelerate exploration, simulate states, validate behavior, and align Product and Engineering.

PROFESSIONAL EXPERIENCE

Softplan Planejamento e Sistemas | Product Designer | Apr 2019 - Mar 2022 | Florianópolis, Brazil

- Designed complex B2B Legal Tech products, balancing high-stakes judicial workflows, legacy mental models, business rules, technical constraints, and consistency across enterprise modules.
- Conducted and supported customer interviews and usability tests; structured insights in Airtable and Dovetail; contributed to a shared Design System across products.

Avanti! Tecnologia & Marketing | UX/UI Designer | Oct 2017 - Apr 2019 | Florianópolis, Brazil

- Designed e-commerce and marketplace experiences for different clients, including navigation, product discovery, cart, checkout, delivery, and pickup in VTEX migration and evolution projects.
- Analyzed legacy e-commerce experiences using Google Analytics, Hotjar, and client business data to inform information architecture, product/category prominence, and improvement opportunities; ran some A/B tests to support UX hypotheses.

Exit Comunicação e Negócios / MGN Studio | Digital Designer | Mar 2012 - Sep 2017 | SC, Brazil

- Designed websites, digital interfaces, and brand systems while gathering requirements, presenting to clients, and collaborating with developers.

CURRENT DESIGN-TO-CODE & QUALITY PRACTICE

- Maintains a personal portfolio in React, Storybook, GitHub, and Vercel, connecting design decisions to implementation and exploring AI-assisted functional prototypes.
- Deepening QA practices for AI-assisted implementation, including Playwright, Chromatic, lint, typecheck, tests, and build validation.

EDUCATION

UniCesumar | Higher Education Technologist Degree in Internet Systems | Completed 2017 | 2,440 hours

ADDITIONAL TRAINING

Agent Lab #2 - AI Agents & Claude Code | Academy Pass | 2026

UX Metrics 2.0 - Product Analytics | User Research - Methods & Best Practices | Agile Methods for UX Design
